

Rapid Response. Responsible Recovery. Environmental Solutions.

Professional environmental, hazardous materials and emergency response services across South Africa and the wider African region.

COMPANY PROFILE 2026

24-HOUR ENVIRONMENTAL EMERGENCY RESPONSE

Environmental expertise when every response matters.

COMPANY OVERVIEW

Environmental Care Response Team (Pty) Ltd (ECRT) is a professional environmental services and hazardous materials management company delivering dependable solutions in high-risk and time-critical environments.

Our multidisciplinary teams support industrial, mining, transport, marine, energy, manufacturing and public-sector clients through rapid emergency mobilisation, specialist technical capability and responsible environmental rehabilitation.

24/7 Response

Emergency readiness and rapid mobilisation.

Cross-Border

Regional capability across Southern and Central Africa.

Turnkey Delivery

Containment, recovery, remediation and compliance support.

Who We Are

Protecting people. Preserving the environment.

PURPOSE & PRINCIPLES

Built for responsible environmental action.

ECRT combines technical expertise, rapid response capability and disciplined project execution to protect people, operations, communities and the environment.

MISSION

Provide professional, safe, sustainable and legally compliant environmental management solutions that protect people, infrastructure, communities and the environment.

VISION

Become a leading African environmental response and hazardous materials management company through operational excellence, innovation, safety leadership and sustainability.

06

Service excellence

REGIONAL CAPABILITY

Mobilised across South Africa and the wider African region.

ECRT provides national and cross-border environmental support for emergency incidents, planned projects and specialist industrial operations.

SOUTH AFRICA

National emergency response, industrial services, asbestos abatement and remediation.

DRC

Mining environmental services, hazardous waste support and spill response.

SOUTHERN AFRICA

Cross-border environmental response and specialist projects.

CENTRAL AFRICA

Regional mobilisation and industrial environmental support.

Integrated Services

Specialist capability. Complete environmental support.

CORE CAPABILITIES

One trusted partner for complex environmental operations.

From immediate emergency containment to long-term rehabilitation, ECRT supports clients through every stage of environmental incident management.

Spill-Control Products

24-HOUR OPERATIONAL READINESS

Hazmat Emergency Response

Rapid containment, incident management and environmental protection for oil, fuel, chemical and hazardous-substance incidents across road, rail, industrial, marine and commercial environments.

- Oil, fuel and chemical spill containment
- Road tanker and transport incident response
- Hazardous substance recovery and transfer
- Emergency site decontamination
- Incident command and environmental protection
- Cross-border response capability

CONTROLLED REMOVAL. COMPLIANT EXECUTION.

Asbestos Abatement & Disposal

ECRT provides planned asbestos removal, controlled handling, decontamination and compliant disposal support for industrial, commercial and infrastructure environments.

- Asbestos surveys and project planning
- Roof-sheet and material removal
- Controlled work-zone establishment
- Packaging, transport and disposal coordination
- Decontamination and clearance support
- Compliance-focused project documentation

SPECIALIST SUPPORT FOR DEMANDING SITES

Industrial Cleaning & Decontamination

Professional industrial cleaning and decontamination services designed for operational facilities, tanks, pipelines, contaminated equipment and high-risk work environments.

- Industrial tank and vessel cleaning
- Pipeline cleaning and decontamination
- Confined-space cleaning support
- Hazardous residue removal
- High-pressure water jetting
- Shutdown and decommissioning support

RECOVERY BEYOND THE IMMEDIATE INCIDENT

Environmental Remediation

ECRT delivers practical rehabilitation and bioremediation programmes for contaminated soil, groundwater, wetlands, rivers and industrial sites.

- Hydrocarbon-contaminated soil remediation
- Wetland and river rehabilitation
- Bioremediation programmes
- Excavation, recovery and disposal coordination
- Groundwater rehabilitation support
- Environmental monitoring and close-out support

SPECIALIST INCIDENT SUPPORT

Marine, Product Transfer & Post-Fire Response

Integrated marine spill response, safe product-transfer operations and post-fire environmental cleanup to reduce risk, recover materials and restore affected areas.

- Marine and port spill containment
- Boom deployment and product recovery
- Damaged-container and tanker transfers
- Fire-water runoff management
- Soot, ash and contaminated debris cleanup
- Environmental recovery coordination

Industries We Serve

Environmental support for critical operations.

SECTOR CAPABILITY

Specialist support across demanding sectors.

ECRT adapts its response model, equipment and technical approach to the operating realities of each client environment.

01

Utilities & rail operations

A disciplined response process.

HOW WE WORK

01

Mobilise

Rapid team deployment, site coordination and immediate risk assessment.

02

Contain

Control the source, protect receptors and establish safe working zones.

03

Recover

Recover product, remove impacted materials and decontaminate affected areas.

04

Rehabilitate

Remediate soil, water or infrastructure and support responsible restoration.

05

Close Out

Document actions, manage waste records and support compliant project closure.

OPERATIONAL COMMITMENT

Safety first. Compliance always.

ECRT operates with a strong commitment to occupational health and safety, environmental protection, risk management and responsible waste control.

- Risk assessments and method statements
- Toolbox talks and site inductions
- PPE and controlled work zones
- Emergency response procedures
- Incident reporting and learning
- Environmental monitoring
- Waste tracking and disposal controls
- Asbestos and hazardous-material controls
- Client coordination and reporting
- Continuous safety improvement

OUR OBJECTIVE

Protect people, minimise environmental harm, reduce operational disruption and deliver every project with disciplined professional care.
